## TALISEN Government Services

### Focus on Quality

Talisen Technologies, Inc. Government Services focuses on providing high-quality technical services, custom application development and managed services to its government customers. These customers are predominately organizations with stringent quality, safety, technical and regulatory requirements. Since 1991, Talisen has directly supported government organizations. Talisen Government Services' comprehensive understanding of the details of executing work within the demanding environment of custom application development, technical and managed services has allowed expansion into a variety of service offerings.

Talisen Technologies, Inc. services address critical areas of IT management for government agencies:

- IT Infrastructure security (hardware and data)
- 24/7 reliable IT infrastructure performance monitoring
- Remote and on-site management of physical hardware and networking equipment
- Network management system process and tools (HP OpenView and ServiceDesk)
- DBA and Application Management Services
- System Integration (Unix and Windows)

### Certifications

- 8a

- 541513:** Computer Facilities Management Services
- 541519:** Other Computer Related Services
- 541611:** Administrative Management and General Consulting Services

Talisen Technologies has been building and providing secure communication systems since its inception. Founded in 1991 to be a clearinghouse for engineering blueprints between The Boeing Company and its suppliers, Talisen evolved into a developer and implementer of technology systems whose primary focus lies in secure communications. Whether it is designing and building a secure network, or providing a secure, single point of controlled access to data and applications, Talisen has the experience, products, and staff capable of implementing a solution quickly and thoroughly.

Talisen's additional value-added services, like custom application development, systems monitoring, help desk administration, and professional staffing will ensure not only continued successful performance, but also a quality relationship of on-going value.
